

WallLine-Tileable - The fully concealed, field-cuttable wall drain engineered for seamless waterproofing integration. WallLine arrives factory-fitted with a flexible waterproofing membrane, making system integration fast, reliable, and code-ready. Its wall-recessed profile eliminates floor interruptions — giving designers and installers maximum creative freedom with a shower floor that's effortless to clean. WallLine's slim footprint makes it ideal for both new construction and retrofit renovations. Cleaner lines. Total confidence.

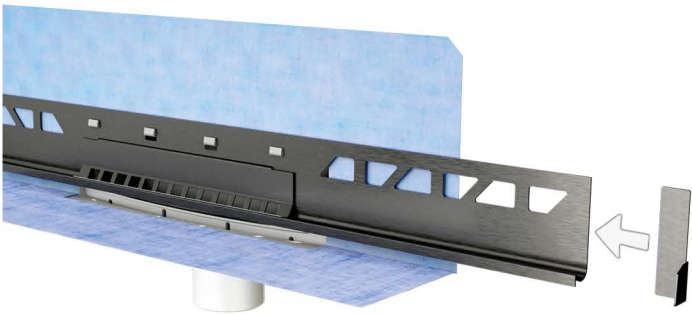

Field-Cuttable Design

Fully cuttable on the jobsite for a precise fit at any opening size — no special tools or factory orders required.

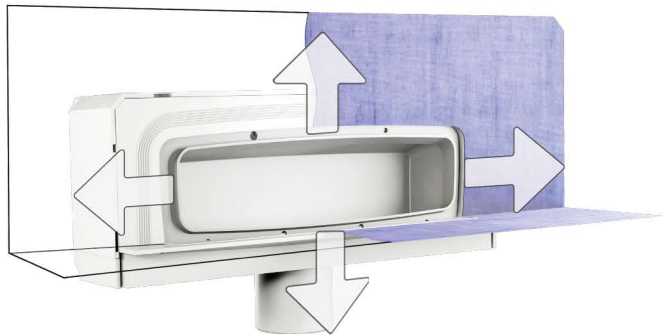

Waterproofing End Caps

After cutting to final length, purpose-engineered end caps seal cleanly and maintain membrane integrity at every termination point.

WallLine Body Kit

With the patented, adjustable eccentric flange for fine adjustment and the drain body that can be variably adapted to the tile thickness, installation is quick and easy.

Easy cleaning and perfect hygiene

WallLine's removable hair strainer catches debris and hair, making cleaning effortless and keeping your drain flowing smoothly.
