Strength, Flexibility & Effortless Maintenance

Proline by Gruen Systems is engineered exclusively for bonded membrane installations, delivering a powerful combination of durability and functionality. Its innovative design features a removable cover for effortless cleaning, while Gruen's supplementary accessories enhance versatility for a seamless fit.

- Designed specifically for bonded membrane installations
- Removable cover for easy maintenance
- Built for demanding environments with robust performance

For professionals who demand strength, adaptability, and reliability, Proline is the ultimate drainage solution.

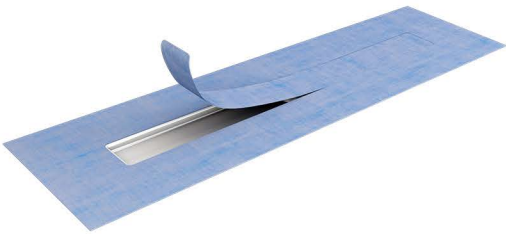

Gradual Height Adjustment

Thanks to the gradual height adjustment set patented by Gruen; no more alignment problems of height and elevation differences occur during installation.

Perforated Membrane

Middle part of the insulation textile is perforated because of preventing unwanted parts fall to the drain.
